

2025-2027 Strategy Overview

The Millennium Water Alliance (MWA) is a global alliance of leading humanitarian, research, and business organizations working together, so that **every community and their ecosystem are water secure**. To reach this goal, MWA delivers global water security and resilience results by mobilizing a community of expert members, driving collective action and thought leadership, and influencing strategic funding, impacting more than 50 million people in over 100 countries each year.

The MWA 2025-27 Strategy responds to today’s pressing water security challenges. It focuses on critical themes such as resilience, sustainable financing, professionalization of service provision, and long-term operations and maintenance models. It cross-links to climate, energy, and agricultural sectors and tackles funding constraints the sector faces through new partnerships and novel solutions.

MWA’s Strategy focuses on three interconnected goals:

Expansion & Versatility

Broaden and diversify our membership and programming and create new opportunities for collaboration and innovation.

Thought Leadership

Deliver catalytic knowledge management and learning to address emerging gaps in water security and resilience.

Broader Influence

Amplify advocacy and partnerships to shape funding and priorities and position water security’s role as a foundation for resilience across sectors.

These goals will lead to:

Growing, diverse membership & collective expertise

Well-resourced and financed membership

Increased member competitiveness

Prioritizing the water security agenda
